#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 58-61, 95 and 97 are rejected under 35 U.S.C. 103(a) as being unpatentable over Boucher (US 3,641,442) in view of Hines et al. (US 2002/0132642).

Regarding claims 58-61, 95 and 97, Boucher discloses first and second switches that gate respective reference signals according to respective control signals to generate harmonically rich signals, combining and summing the signals and filtering to isolate at least one harmonic. See FIGS. 1 and 2, col. 2, lines 48-75 and col. 6, lines 28-44.

Boucher fails to disclose an antenna transmitting the combined harmonically rich signal. However, in an analogous art, Hines discloses an apparatus in which an antenna 101 transmits a combined harmonically rich signal. See FIG. 1, paragraph 15, lines 1-13 and paragraph 21, lines 1-7. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the apparatus in Boucher by incorporating these features taught in Hines for the purpose of allowing a receiver to analyze or respond to a signal carrying complex information on a plurality of harmonics.

### ***Allowable Subject Matter***

3. Claims 56, 57, 90-94 and 96 are allowed.

Art Unit: 2617

4. The following is a statement of reasons for the indication of allowable subject matter: the claims are allowed for the reasons stated in the previous Office action.

*Response to Arguments*

5. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

*Conclusion*

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
